Comfort

SPEECH SEPARATION & MIC NOISE CANCELLING

Be heard very clearly no matter how noisy your environment is.

- **Speech Separation**, AENC VOICE™, our self-developed AI algorithm and audio chip, which can tell your voice and block out nearby talkers. Both the receiver and the caller can concentrate on the call.

- **3 premium noise cancelling microphones**, effectively block 98 % of background noise. Let your voice be heard, not the noise around you.

360° INTEGRATED BUSYLIGHT

Make your working status visible.
No missing calls.

- **When you have an incoming call,** 360° Busylight glows red. It is visible from any direction.

- **When you're on a call or in a meeting,** the red light is automatically activated.

- **When you want to be focused,** you can activate it manually. It shows your colleagues that you are busy in a polite way.

MS TEAMS OPTIMIZED

Microsoft Teams

It is MS Teams optimized for seamless collaboration, gives you easy call management with in-line control.
